Learning Goals:

- Participants will discuss ATSA student members' clinical and research contributions to the field.
- Participants will critique ATSA student members' approaches and identify areas for future research and practice.
- Participants will describe the relevance of presentations to the future directions of the next generation of ATSA.

Farron Wielinga completed her B.A. (Hons) in psychology at MacEwan University. Her research interests include risk assessment of sex offenders, violent offenders, and Indigenous issues within the justice system. Her honours thesis focused on the predictive validity of an actuarial risk assessment, BARR-2002R, in a police context, and she is a research assistant examining the assessment of intimate partner violence risk in law enforcement. Her interest in criminal justice extends to involvement in the community, where she serves on the Citizens Advisory Committee at Edmonton Institution for Women, and with her academic institution, where she serves on the U-SOLVE committee to address campus sexual assault.
